You're about to initialize a Firebase project in this directory:

  /Users/kelseyburgos

Before we get started, keep in mind:

  * You are initializing in an existing Firebase project directory

? Which Firebase CLI features do you want to set up for this folder? Press Space to select features, then Enter to confirm your choices. (Press <space> to select, <a> to toggle all, <i> to invert selectio
n)

Error: Must select at least one feature. Use SPACEBAR to select features, or provide a feature with firebase init [feature_name]
kelseyburgos@Mercedess-MacBook-Air test1 % firebase init

######## #### ######## ######## ########   ###   ###### ########

   ##   #### ##    ## ######## ########  ##   ## ######  ########

You're about to initialize a Firebase project in this directory:

  /Users/kelseyburgos

Before we get started, keep in mind:

  * You are initializing in an existing Firebase project directory

? Which Firebase CLI features do you want to set up for this folder? Press Space to select features, then Enter to confirm your choices. Hosting: Configure and deploy Firebase Hosting sites

=== Project Setup

First, let's associate this project directory with a Firebase project.
You can create multiple project aliases by running firebase use --add,
but for now we'll just set up a default project.

i  .firebaserc already has a default project, using cse4050burgos.

=== Hosting Setup

Your public directory is the folder (relative to your project directory) that
will contain Hosting assets to be uploaded with firebase deploy. If you
have a build process for your assets, use your build's output directory.

? What do you want to use as your public directory? public
? Configure as a single-page app (rewrite all urls to /index.html)? No
? Set up automatic builds and deploys with GitHub? No
? File public/404.html already exists. Overwrite? Yes
✔  Wrote public/404.html
? File public/index.html already exists. Overwrite? Yes
✔  Wrote public/index.html

i  Writing configuration info to firebase.json...
i  Writing project information to .firebaserc...

✔  Firebase initialization complete!
